

TIPADO DINÁMICO

CAMBIO DE TIPO

```
let isActive = "1";  
  
console.log(typeof isActive); // <-- string  
  
isActive = true;  
  
console.log(typeof isActive); // <-- boolean  
  
isActive = 1;  
  
console.log(typeof isActive); // <-- number
```

El tipo cambia de forma dinámica

CASTING DE VARIABLES

```
let isActive = "1";  
  
console.log(typeof isActive); // <-- string  
  
isActive = Boolean(isActive);  
  
console.log(typeof isActive); // <-- boolean
```

El tipo de la variable cambia por casting

FUNCIONES DE CONVERSIÓN

```
let currentYear = "2023";

// Casting a numero
currentYear = Number(currentYear);

// Casting a boolean
currentYear = Boolean(currentYear);

// Casting a string
currentYear = String(currentYear);

// Casting a null
currentYear = null;

// Casting a undefined
currentYear = undefined;

console.log(typeof currentYear);
```

- A número
 - Number(...)
- A booleano
 - Boolean(...)
- A texto
 - String(...)
