VISTAS

SPRING MVC NO SE CASA CON NADIE

- Tecnología de la vista independiente
 - Interfaces View y ViewResolver
- Múltiples opciones que se pueden conectar

POSIBLES TECNOLOGÍAS

- Thymeleaf
- Freemarker
- Groovy Markup
- JSP y JSTL

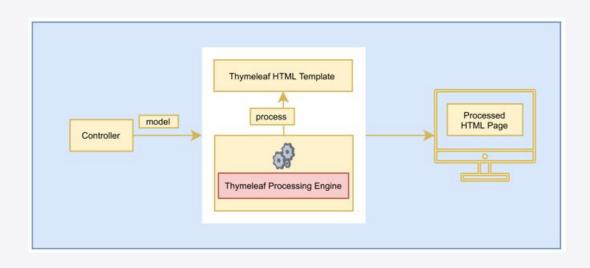

OTRAS TECNOLOGÍAS

- Script views: mustache, handlebars, ...
- PDF (OpenPDF), Excel (Apache POI)
- ...

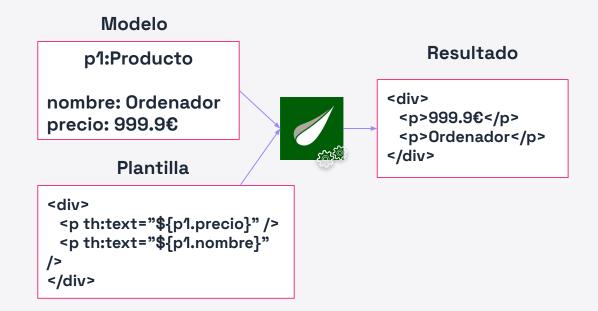

AÑADIR THYMELEAF A NUESTRO PROYECTO WEB

Project		Language		Dependencies	ADD DEPENDENCIES # + B
O Gradle - Groov	vy	Java O Kotlin	O Groovy		
O Gradle - Kotlin	Maven			Spring Web WEB	
Spring Boot				Build web, including RESTful, applications as the default embedded container.	using Spring MVC. Uses Apache Tomcat
O 3.4.0 (SNAPSI	HOT) O 3.4.0 (M2)	O 3.3.4 (SNAPSHOT)	3.3.3	as the default embedded container.	
O 3.2.11 (SNAPS	SHOT) O 3.2.10	,		Thymeleaf TEMPLATE ENGINES	
				A modern server-side Java template engine for both web and standalone	
Project Metada	ta			environments. Allows HTML to be correctly prototypes.	displayed in browsers and as static
Group	com.openwebinars			prototypes.	
Artifact	web				
Name	web				
Description	Demo project for Spring Boot				
Package name	com.openwebinars.web				
Packaging	Jar O War				
Java	O 22 O 21	17			

THYMELEAF: UN MOTOR DE PLANTILLAS

THYMELEAF: UN MOTOR DE PLANTILLAS

THYMELEAF: NATURAL TEMPLATING

 Atributos en etiquetas HTML vs nuevas etiquetas

```
<div>
